

IAN THOMAS WHITE

Researcher | Software Engineer | Computational Linguist

ianthomaswhite[at]gmail.com | ianthomaswhite.com | github.com/ianthomaswhite

EDUCATION

Bachelor of Arts / Science in Linguistics & Computer Science

2018 – 2022

Academic Honors / Departmental Distinction

- Focus in historical phonology, comparative Indo-European grammar, and type systems.

EXPERIENCE

Lead Developer & Computational Linguist

2023 – Present

Linguistics & Functional Systems Research

Remote / Independent

- Designed an IPA-based Indo-European comparative lexicon and phonological sound-change pipeline.
- Engineered static site architectures and type-safe backend systems using Haskell (Hakyll, Yesod).
- Built CI/CD pipelines deploying LaTeX-compiled research assets and documentation automatically.

Research & Software Engineer

2021 – 2023

Academic & Technical Systems Group

United States

- Authored technical monographs, grammar specifications, and documentation in LaTeX.
- Developed high-throughput textual corpus ingestion tools and automated test suites in Haskell/Python.
- Implemented structured data models for phonetic inventories and lexical databases.

SELECTED PROJECTS

IPA Indo-European Comparative Dictionary

2024 – Present

- Systematic reconstruction tool tracing Proto-Indo-European etyma across Germanic, Celtic, Romance, Slavic, Indo-Iranian, and Greek, strictly aligned to IPA representations.

AI-Powered LaTeX Dossier & Resume Engine

2025

- Programmatic Haskell pipeline transforming structured metadata into pixel-perfect PDF publications.

Minimalist Brutalist Web Platform

2026

- Custom Hakyll static generator with zero runtime dependencies and continuous delivery on GitHub Pages.

TECHNICAL SKILLS & COMPETENCIES

- **Languages:** Haskell, Bash, Python, SQL, HTML/CSS.
- **Typesetting & Publishing:** LaTeX (pdflatex, lualatex, TikZ), Pandoc, Git, Markdown.
- **Linguistics:** Historical Phonology, Proto-Indo-European, IPA Transcription, Morphology.
- **Systems & Tools:** Linux/Unix, GitHub Actions, Docker, Static Site Generation.
